

Simply grab and toss...no dilution, measuring, mixing, special equipment or cleanup! Packaged in resealable airtight pails for easy storage and handling. Portion controlled for simplified application. Rapidly dissolving packet and unique micronutrient enriched carrier provide accelerated germination, growth and superior enzyme production while reducing odor, BOD, COD, suspended solids, turbidity and ammonia concentrations. Scientifically selected aerobic and facultative anaerobic bacteria provide outstanding performance, even in low oxygen environments. Stable bacteria spores enhance shelf life and guarantees microbial concentration. Spore-form allows it to resist chlorine, disinfectants, and high water temperatures. This product utilizes the powerful waste digesting abilities of special bacteria and natural enzymes. It is a blend of bacillus bacteria strains cultured for their ability to digest organic waste – quickly, efficiently and without odors! These strains will work both in the presence of oxygen (aerobic digestion) and in the absence of oxygen (anaerobic digestion). The natural enzymes quickly break down proteins, starch, carbohydrates, animal and vegetable fats & oils, and paper for the most effective waste digestion. Regular use of this product will establish thriving colonies of these waste-digesting bacteria to provide uninterrupted cleaning action in drains, plumbing and septic systems. This continuous digestion prevents accumulation of sludge, scum, grease and all other organic solids. It unclogs drains for full flow and reduced odors. In septic systems, it will eliminate solids carry-over and odors, and reduce the frequency of pump-outs. It introduces micro-organisms into the soil for improved drainage and smooth operations of drainfields or leach beds.

APPLICATIONS

- Animal waste pits, lagoons and storage tanks.
- Septic and holding tanks, leach beds and lift stations.
- Portable and pit toilets, boats and RV's.
- Ornamental ponds and fountains.

This Product Contains	CAS Number:
Sodium Chloride	7647-14-5
Yeast Culture	No CAS Number
Genes Bacillus	68038-68-6
Proteolytic Enzyme	9014-01-01
Sodium Bicarbonate	144-55-8

REX-BAC-T™ BP-303 BIO-PAKS

A CONCENTRATED, DRY BLEND OF STABILIZED
BACTERIAL SPORES AND MICRONUTRIENTS
IN INDIVIDUAL WATER SOLUBLE PACKETS

ALL NATURAL – SAFE TO USE

NET CONTENTS: 50 X 0.25 Pound Water-Soluble Packets

Sold By:

DIRECTIONS FOR USE

The best results are obtained by adding the digestant at the end of the day or other period of lowest flow. To prevent loosened debris from causing obstructions, always begin the treatment program by treating the lower floors first. Disinfectants and harsh drain openers may kill the bacteria. Allow several hours after the use of these products, then re-treat with digestant.

Septic Systems:

- Initial Treatment:** Use 2 packets in the first month (flush down separate toilets). Added directly to the septic tank is ideal.
- For maintenance:** Flush into toilet 1 packet per month.

NOTE: To keep drain fields and leach beds operating properly, dissolve 1 packet into the distribution box. Repeat this treatment weekly until flow is improved.

Pit Toilets: To reduce odors, increase capacity and liquefy solids in pit toilets, use 1 packet per 500 gallons of capacity. Make the addition of these packets weekly. NOTE: Discontinue the use of formaldehyde preservatives or disinfectants in these toilets.

Storage and Handling: Store in a cool, dry location. Keep pail tightly closed when not in use.

CAUTION

May irritate eyes. Avoid contact with eyes. Do not take internally.

FIRST AID

- If In Eyes:** Wash thoroughly with water.
- If Swallowed:** Give person several glasses of water and induce vomiting. Obtain medical assistance.
